

Title

Tic-Tac-Toe AI

Project Description

This project is a simple Tic-Tac-Toe AI game developed using Python. The player competes against the computer in the terminal. The AI uses the Minimax algorithm to make smart moves.

Features

Human vs AI gameplay.
Minimax algorithm.
Win/Lose/Draw detection.
Terminal based interface.

Technologies Used

Python 3
Visual Studio Code

How to Run

Run the file `tic_tac_toe.py` using Python and play by entering positions 1 to 9.

Conclusion

This project improved my understanding of Python programming, game logic, and artificial intelligence concepts.
