

Title

ArmaanBot - Rule Based Chatbot

Project Description

ArmaanBot is a simple rule-based chatbot developed using Python. It responds to predefined user inputs and runs in the terminal until the user types 'exit'.

Features

- Greet users
- Answer predefined questions
- Exit command
- Beginner-friendly

Technologies Used

Python 3, Visual Studio Code

How to Run

Run chatbot.py using Python and interact through the terminal.

Output

The chatbot accepts input and displays predefined responses.
